

Simon Tekle Tesfatsion

Tankebygggarbacken 89 • Stockholm, Sweden • simon.tekle823@outlook.com • +46(0)737229360

Education

KTH Royal Institute of Technology

Stockholm, Sweden

B.Sc. in Computer Science and Engineering

August 2022 – June 2025

- Bachelor thesis: *“Microkernel vs Monolithic Kernel: A Practical Evaluation of Performance, Stability and Security”*. Benchmarked Ubuntu (monolithic) against Minix 3 (microkernel). [\[DiVA\]](#)

Skills & Interests

Technical Skills:

Programming: Java, C#, C, Python, JavaScript, TypeScript, Kotlin

Backend & Frameworks: Spring Boot, ASP.NET, Node.js, Entity Framework Core

Mobile Development: Android (Kotlin), React Native

Frontend: React, HTML, CSS

Databases: PostgreSQL, MySQL, MongoDB, InfluxDB

DevOps & Cloud: Docker, Kubernetes, CI/CD, Grafana

Tools: Git, Linux, OpenAPI/Swagger, AI-assisted development (Claude, GitHub Copilot)

Methodologies: Agile, Scrum

GitHub: github.com/simontekledev

Portfolio: simontt-portfolio.netlify.app

Interests: Software development, finance, trading, fitness, and gaming.

Experience

Tasksmith.ai

Stockholm, Sweden

Software Engineer | Part-time

April 2026 – Present

- Designing and implementing full-stack features using TypeScript, React, and Node.js across an AI-driven legal-tech platform.
- Optimizing LLM-based systems through prompt architecture, prompt caching, tool-routing logic, and cost-aware inference across multi-provider agent infrastructure (Claude, OpenAI, Gemini).
- Designing integration and end-to-end test infrastructure specifically for AI agent systems, including provider-parity testing, runtime tool-catalog validation, and behaviour benchmarking, to detect regressions in non-deterministic systems.
- Conducting cross-provider benchmarking to identify failure modes and inform prompt and tooling improvements.

Infor

Stockholm, Sweden

Backend & DevOps Intern | Project intern

April 2024 – June 2024

- Developed and maintained a proof-of-concept Java Spring-based microservice that sends custom application metrics to InfluxDB and Grafana.
- Focused on developing, researching, and optimizing the viability of using Java, Spring, and Micrometer for telemetry.
- Optimized and researched different application metrics and their importance in sensitive systems.
- Worked with Java, Spring Boot, Micrometer, InfluxDB, SQL, Grafana, DevOps, CI/CD, Unit Testing, Docker, Kubernetes, Lens, and Git.
- Collaborated in an agile team environment following Scrum methodology.

Avarn Security

Stationary Guard | Part-time

Stockholm, Sweden

June 2024 – Present

- Ensured the safety and security of client premises through monitoring and patrolling.
- Provided exceptional customer service by assisting visitors and managing access control.
- Documented incidents and maintained logs to support efficient operations.

Projects

GrannFix | [GitHub](#)

- **Description:** Full-stack neighborhood task marketplace (Swedish TaskRabbit) with bidding, real-time chat, ratings, and push notifications.
- **Technologies:** Spring Boot, PostgreSQL, JPA/Hibernate, JWT with refresh tokens, OpenAPI, React Native (Expo), Firebase Cloud Messaging, Docker.
- **Highlights:** Contract-first API with auto-generated type-safe client, cursor-based pagination, task lifecycle modeled as a state machine, and layered architecture (Controller/Service/Repository) with DTO separation.

CrateFlow | [GitHub](#)

- **Description:** Backend monitoring solution for Java microservices that exposes both operational metrics (latency, errors) and business metrics (sales, inventory, profit) from a single instrumentation layer.
- **Technologies:** Java, Spring Boot, Micrometer, InfluxDB, H2, Grafana, Maven, Docker, Kubernetes (Helm), GitHub Actions.
- **Highlights:** Real-time time-series metrics pipeline, containerized deployment with Helm charts, CI/CD workflow, and inventory/transaction REST API serving as instrumentation target.

AuctionPlatform | [GitHub](#)

- **Description:** Full-stack online auction platform built in a two-person team, supporting user registration, auction creation, bidding, winner resolution, and administrative management.
- **Technologies:** C#, ASP.NET Core 8 MVC, Entity Framework Core, ASP.NET Core Identity, SQL, HTML, CSS.
- **Highlights:** Three-layer architecture (Controller / Core / Persistence) with DTO mappers, EF Core migrations for schema versioning, and Identity-based authentication with role-separated admin tools.

Volunteer Experience

We Are One Church

Info Desk Volunteer | Part-time

Stockholm, Sweden

August 2025 – Present

- Provide information and assistance to visitors, ensuring a welcoming and organized environment.
- Manage sales of church books and merchandise, handling digital payments.
- Distribute and manage translation devices for attendees requiring language support during services.
- Contribute to maintaining an organized and welcoming atmosphere for church members and guests.
